

THE WAITING BOX with an integrated advancement mechanism

MOOVER

DESIGNED FOR PROFESSIONALS AND LARGE FARMS

The **Moover** is much more than a cow pusher.

It moves cattle **quickly, safely, and without stress directly to the hoof-trimming chute** at the push of a button, **thanks to its patent-pending advancement mechanism** with an integrated progression system.

This system simplifies and streamlines the process of guiding cattle from the waiting area to the chute.

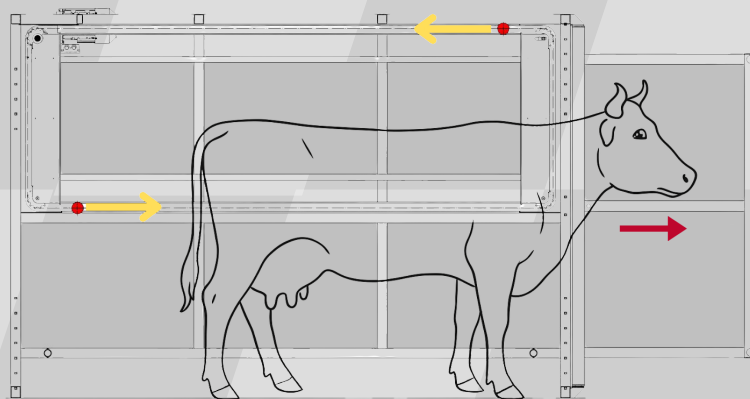

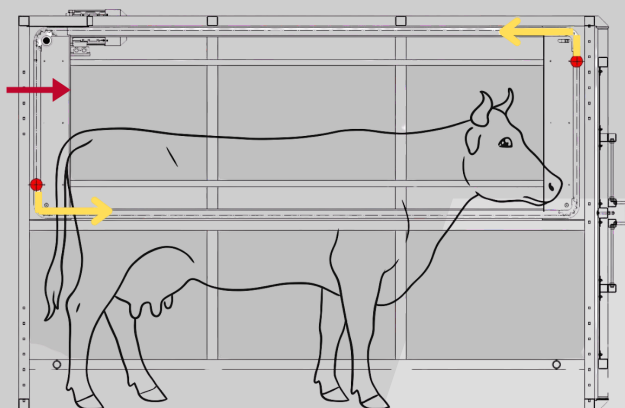

The Moover is ideal for mobile hoof trimmers and large farms with stationary setups, supporting both walk-in and tilt chutes.

It improves safety, lowers stress, and allows for faster handling of cattle.

Designed for people who want to make the most of their time!

MOOVER

Equipped with a fully integrated motorised progression system

Dual continuous revolving cross connections provide easy locking for pre-treatment holding and quick entry into the treatment chute

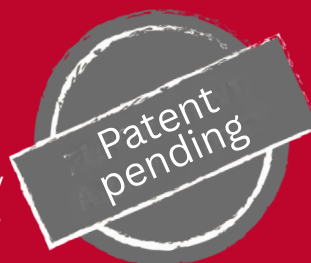

User-friendly manual operation is available at both the rear and the front of the structure

OPTIMISED WORKFLOW & TIME SAVINGS

- **Motor-powered advancement mechanism** eliminates the need for manual guidance
- **Faster movement** ensures smoother operations and significant time savings
- **Higher throughput per hour** enhances cost-effectiveness and performance

SAFETY & ANIMAL WELFARE

- **Stress-free advancement** creates a calmer, more controlled process
- **Reduced animal contact** greatly enhances occupational safety
- **Targeted animal separation** ensures safe handling during the advancement process

Video

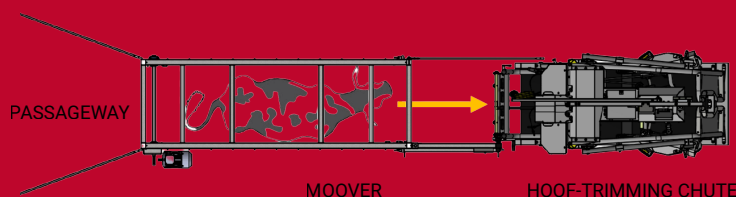

FLEXIBILITY & COMFORT

- **Compatible with all types of hoof-trimming chutes**, from mobile to stationary, including both walk-in and tilt designs
- **Three-way control** at the rear, front, and optionally via remote—all accessible at the touch of a button
- **Modularly expandable**, with crowd gate connections all around, supports, and an optional chassis

EQUIPMENT & SPECIFICATIONS

- Controls at rear and front, with optional remote control
- The front door features an integrated lock and door can hinged to open either left or right
- Optional front door extension connects to the hoof-trimming chute
- Fully enclosed to keep animals calm
- Hot-dip galvanized frame ensures robustness and durability
- Integrated electric motor (400 V/16 A)
- Total weight approximately 550 kg
